

ViewPoint: FINANCIAL REPORTING AND OLAP

Multiview's powerful reporting environment, ViewPoint is far more than a financial report writer. ViewPoint is a reporting environment that gives you production financial reporting, on-line analytical processing (OLAP), and drill-down all in one tightly-integrated, powerful, easy-to-use package.

ViewPoint works with the Multiview suite "out-of-the-box", to let your senior executives, operational managers, department managers and other end-users do revenue, expense, product and line-of-business reporting and analysis easily and efficiently - no IT involvement necessary! Best of all, ViewPoint eliminates the need for your non-finance end-users to have a detailed understanding of your accounting structure!

SEE THE UP-TO-THE-SECOND INFORMATION YOU NEED—NOW!

Multiview ViewPoint gives you access to the corporate performance data that you—and your users—need to manage your organization effectively.

- **Eliminate waiting.** ViewPoint lets you see information that is completely up-to-date—right down to the transaction that was entered seconds before! There is no lag time between entering data in Multiview and when it shows up in a ViewPoint report. ViewPoint makes continuous monitoring and up-to-the-second reporting a reality.
- **See things your way.** ViewPoint lets you format your reports the way you want to see them, without any need for involvement from IT staff.
- **Get answers without headaches.** ViewPoint was designed for end-users without the need for any IT help. End-users both inside and outside the accounting department can easily build the financial reports they want.
- **Be proactive.** ViewPoint allows you to do detailed "what-if" analysis BEFORE a proposed change (e.g. a reorganization) so you can assess the impact while there's still time to affect the decision.
- **Eliminate errors.** Multiview's use of business rules ensures that data captured anywhere in the suite is available to ViewPoint for reporting and analysis.

GET EVERYTHING YOU NEED IN ONE PRODUCT

ViewPoint is really three products in one: a financial report writer; an OLAP tool; and, a drill-down product. You use it the way you want, to get to the information you need.

- **Enjoy top-to-bottom transparency.** Multiview's powerful report writer allows you to "drill-down" through a report, to see an OLAP analysis of any value. From there, you can drill right down to the entries that created it, and you can even see an electronic image of source documents!
- **Communicate your way.** You can publish your reports in a variety of well-known formats, including PDF, HTML or Microsoft® Excel. Your end users receive it in the form they need.
- **Control your own environment.** ViewPoint's design allows the accounting staff to build, maintain and distribute reports without IT involvement.
- **Work internationally.** ViewPoint lets you take advantage of the multi-currency capability of Multiview, so you can view reports in foreign currencies.
- **Focus on analysis not just accounting.** Multiview's unique design links operational data (e.g. number of units sold) to financial data, so you get more than just financial statements—you get operations analyses too!
- **Save time and effort.** ViewPoint uses a spreadsheet-style interface that's familiar to financial professionals, so it's quick to learn and easy to use.

The ViewPoint Financial Reporting and OLAP environment gives you production reporting, on-line analytical processing, ledger reporting, and top-to-bottom drill-down capability. All this is delivered in one integrated, powerful, easy-to-use package.

SAVE STEPS

ViewPoint's reporting capabilities go way beyond reporting and analysis, for those users you authorize to do so.

- Retrieve data, analyze and revise it, then upload corrections into your GL—in one step.
- Sophisticated yet easy-to-use graphing functions let you present your data in easy to understand graphs and charts.
- When you need ledger reporting, our environment lets you see the detailed transactions without requiring detailed knowledge of the charts of accounts or your organization chart.
- The entire Multiview reporting suite is integrated “out-of-the-box” with your financial data warehouse. There is no need to involve your IT staff in “data plumbing” projects.

COMPLY WITH REGULATORS AND AUDITORS

Multiview's Financial Reporting and OLAP capability is rich in functionality to help you get to the information you need to address the concerns of regulators and auditors. In addition, the tools themselves have a number of important control points :

- The ability to drill down through the data—right to an image of the external document that created a specific transaction—results in complete, top-to-bottom transparency of every business event.
- Standard calendars and relative dates ensure that reports use and re-use consistent time periods, eliminating cut-off errors.
- Security by value (e.g. by operating unit or account) protects your data by allowing you to limit who can see or change information in a report.
- ViewPoint reports can be run and re-run as of any date, so you can recreate any historical report with ease.

USE MULTIVIEW AS YOUR KEY TO GET OUT OF DATA JAIL

Multiview's Financial and OLAP reporting tools mean you have the key you need to get out of “data jail”. Your vital financial data is no longer locked up in difficult-to-access legacy databases or dozens of spreadsheets. Multiview gives you complete answers, straight from a “single point of truth” database, with ease and unprecedented speed.

ENJOY SEAMLESSLY-INTEGRATED, ADAPTIVE SOFTWARE

As part of the Multiview Financial Software suite, ViewPoint gives you a single point of entry that guarantees consistent information, and eliminates reconciliation problems. The Multiview suite provides you with an adaptable, integrated and comprehensive financial data warehouse. Our product is ready to be data mined by your end users, yet requires no IT involvement.

The genius of Multiview is in the simplicity; the power is in the adaptability. Our exceptional design can support your organization's growth, without the usual growing pains. Multiview's products reflect the best practices of over two decades of evolution, and the feedback of thousands of Multiview users.

TOP-NOTCH SERVICE AND SUPPORT

As a Multiview customer, your call goes directly to your assigned Customer Support representative, who understands your business and needs. This personal service, combined with the fact that our Customer Support accountants have 50+ years of accounting and Multiview experience, results in 98% “first call” resolution.

IMPLEMENTATION GUARANTEE

Our 60-day guarantee means you can be up and running in a heartbeat!
