

MULTIVIEW GENERAL LEDGER

Most companies are not lacking in raw financial data, but they do find it difficult to get the up-to-date information that they want, when they want, and in the form that they want. Multiview's General Ledger (GL) product was designed from the outset to adapt to those needs, and to accommodate other real-world financial reporting, regulatory reporting, and control requirements of your organization.

THE PERFECT SOLUTION FOR DYNAMIC ORGANIZATIONS

Multiview General Ledger puts the financial information you need within reach, and guarantees you timely access to the information your organization requires, both now and into the future.

- **Save time, reduce effort and errors.** View performance data from any perspective—be it GAAP, tax, managerial, or regulatory—all without having to recode a single transaction!
- **Meet the needs of your senior management.** Produce accurate financial statements only minutes after a reorganization!
- **Become a proactive contributor in the boardroom.** Run detailed “what if” financials before a proposed reorganization!
- **Eliminate errors and extra work.** Accommodate multiple fiscal periods, charts of accounts, and organizational structures—from a single set of transactions!
- **Handle international business easily.** Report in an unlimited number of foreign currencies, manage potential offshore exposure and track gain and loss at the detail level.
- **Give your managers the information they really need to plan and monitor.** Record key business metrics or statistics at the same time as the related financial transaction.
- **Work the way you want.** Multiview GL is designed to adapt to your existing business processes—not the reverse. Create an accounting structure that exactly matches your unique business needs.

EASY-TO-USE, FAST, POWERFUL REPORTING

In today's world, you can't afford to depend on an overburdened I.T. organization to produce your reports. Multiview solves this problem by putting a powerful, easy-to-use, seamlessly-integrated reporting tool in your hands: **D.A.V.E.** (Direct Access Viewing Environment).

D.A.V.E. is a financial report writing and analysis tool with a difference. From a D.A.V.E. report, the end user can drill down to any level, and ultimately reach an electronic image of the document that supports that transaction. Most importantly, the information you see in D.A.V.E. reflects the latest, up-to-the-second state of your business—zero lag time!

- **Get answers while there is still time to influence results.** Create any type of comparative or analytical report, based on up-to-the-second information.
- **Arm your managers for effective action.** Compare results by region, product, project, work order, or any other meaningful dimension you need to analyze.
- **Eliminate trips to the filing cabinet.** Drill down to the lowest level of detail—or an electronic image of any supporting document—in seconds.

HELPING YOU COMPLY WITH REGULATORS AND AUDITORS

Multiview General Ledger is rich in functionality to help you address the concerns of regulators and auditors. Multiview helps you to maintain an effective, well-documented system of internal control. Here's a sampling of features within Multiview that contribute to this:

- Multiview's CFO Lockbox provides you a central place to record all important decision points, giving you an audit trail of when, why and who made each decision affecting internal controls.
- The ability to drill down from financial statements right to an image of the external document that supports a specific transaction results in complete, top-to-bottom transparency of every business event!
- Functional security ensures that only those users who are specifically authorized to perform an important function can do so (e.g. post a prior period adjustment).
- Sophisticated, real-time entry validation ensures that all data captured conforms to your reporting requirements and standards.
- All audit adjustments can be easily segregated for reporting purposes, so results can be viewed with or without them included.
- Advanced password management features such as password aging and enforcement of strong passwords helps to strengthen this control.
- Multiview's fully-integrated Workflow product provides a visual medium for the set up and management of all of the complex authorization and review processes needed as part of your system of internal control.
- Multiview's ability to link non-financial and financial information in a single transaction provides a "single point of truth" that is easy for you to track and audit.
- Security by value protects your data by allowing you to limit who can access sensitive information.

Multiview General Ledger is the foundation block of an integrated, comprehensive, constantly up-to-date corporate performance data warehouse that is ready to be mined by your end users.

COMPREHENSIVE FINANCIAL MANAGEMENT

Multiview General Ledger provides all the functionality you expect from your software. Advanced features include:

- Simultaneous multiple fiscal years
- Reporting in multiple currencies
- Sophisticated intercompany transaction capabilities
- Unlimited budgets, including planning for non-financial business metrics or statistics
- Reporting for any time period, at any level, on any type of data
- Interface functionality that permits easy and fast data import/export from/to your operational systems.

ENJOY SEAMLESSLY-INTEGRATED, ADAPTIVE SOFTWARE

As part of the Multiview Financial Software suite, General Ledger gives you a single point of entry that guarantees consistent information, and eliminates reconciliation problems. The Multiview suite provides you with an adaptable, integrated and comprehensive data warehouse. Our product is ready to be data mined by your end users, yet requires no IT involvement.

The genius of Multiview is in the simplicity; the power is in the adaptability. Our exceptional design can support your organization's growth, without the usual growing pains. Multiview's products reflect the best practices of over two decades of evolution, and the feedback of thousands of Multiview users.

TOP-NOTCH SERVICE AND SUPPORT

As a Multiview customer, your call goes directly to your dedicated Customer Support representative, who understands your business and needs. This personal service, combined with the fact that our Customer Support accountants have 50+ years of accounting and Multiview experience, results in 98% "first call" resolution.
