

MULTIVIEW INVENTORY

Multiview Inventory (MVIN) complements the rich functionality of Multiview Purchase Order by allowing you to manage the receipt, movement, costing and withdrawal of items from your stores inventory. MVIN is an extremely flexible product that allows you to carefully control your fulfillment of orders. Multiview Inventory allows you to establish the costing method best suited to your needs, and to easily track the value of your inventory. It is seamlessly integrated with Multiview's Accounts Payable, Order Entry, Accounts Receivable, and General Ledger products.

GET RICH FUNCTIONALITY AND FLEXIBLE COSTING

Multiview Inventory provides all the functions and features you need to proactively control your inventory.

- **Reduce spoilage and shortages.** Multiview Inventory allows you to monitor lot numbers, expiry dates, shelf life and serial numbers, so you can stay ahead of spoilage and never be caught short.
- **Save money.** MVIN allows for an unlimited number of warehouses, each of which can house multiple inventory areas. Our product melds to the way you do business, not the reverse, so implementation is a breeze.
- **Improve accuracy.** MVIN allows you to establish the costing method—product by product—that best meets your needs. Choose from LIFO, FIFO, Average Cost, Standard Cost, and Actual Cost.
- **Price accurately.** MVIN allows you to record an unlimited number of costing layers per product, so your valuation can stay accurate, and not be limited by artificial software constraints.
- **Track movement clearly.** MVIN produces traveler documents to back up the movement of goods throughout your organization.
- **Eliminate the cracks.** MVIN provides a process to record and track goods in-transit between warehouses or even between related companies.
- **Improve your matching.** Inventory uses the same approval methods as the PO product. Receipts are automatically matched for Accounts Payable purposes. Inventory transactions automatically and instantly create GL entries.

IMPROVE YOUR MONITORING AND REPORTING

Multiview Inventory's extensive reporting and on-line, real-time inquiry allows you to review and manage your inventory effectively. A full suite of printed reports and transaction listings addresses all of your reporting needs.

- **Improve accrual accuracy.** Multiview Inventory can track and report on receipts booked prior to the receipt of an invoice. This gives you the critical "goods received but not invoiced" accrual at period-end.
- **Reduce effort and improve speed.** All information entered by any department or user is available to any authorized user in your organization. No duplicate entry, no reconciliation problems, no lag times.
- **Improve your management oversight.** MVIN comes with a set of reports that allow you to highlight important exceptions, such as the Purchase Price Variance Report and the Expiry Date Report.
- **Reduce operational effort.** Multiview Inventory includes standard reports that simplify life for your operations staff. Examples include: Quantity Adjustment Report; Stock Out & Over Stock reports; Cost Adjustment Report; and Stock Status Listing.
- **Get the details you need when you need them.** Detailed transaction listings and on-line queries allow you to see all the details in any important area, including: Receiving; Returns; Transfers; In Transit; Fulfillment; Inventory Sales and Outstanding PO's.
- **Be proactive.** User-defined flags can be set up for certain statuses (e.g. below minimum on-hand).

Multiview Inventory is an extremely flexible product that allows you to carefully control the receipt, movement, costing and withdrawal of goods from your stores inventory.

STREAMLINE YOUR PERIODIC OR CYCLIC INVENTORY COUNTS

Multiview Inventory facilitates the activities required to do inventory counts by:

- Automatically generating count sheets that are organized by warehouse, area and bin location.
- Allowing you to freeze or thaw areas during a count.
- Providing an on-line facility to record actual count details, variance explanations, and dispositions.
- Providing an ABC classification to group items by cycle count frequency.

COMPLY WITH REGULATORS AND AUDITORS

Multiview's Inventory product is rich in functionality to help you maintain an effective, well-documented system of internal control, and thus address the concerns of regulators and auditors. A sample of control points includes:

- Security by function ensures that only those users who are specifically authorized to perform a high-risk task can do so (e.g. authorize a write-off for shrinkage).
- Security by value protects your data by allowing you to limit who can see and manipulate what information. For example, the system can limit inventory withdrawals for certain product types to particular persons.
- The ability to drill down through the data—right to an image of the external document that created a specific transaction—results in complete, top-to-bottom transparency of every business event.
- Automatic matching functions allow you to force receiving staff to match all receipts to valid, approved PO's.
- You can force receiving staff to count and enter quantities, rather than relying on packing slips.
- You can have Multiview automatically generate count sheets for a random choice of products, based on a frequency you determine.

GET UNPRECEDENTED INFORMATION ACCESS AND REPORTING POWER

With online inquiry and a host of reporting options, Multiview Inventory lets you manage your business as never before.

- You have online access to up-to-date information about everything in Multiview, so you always have latest, complete financial picture. Spend your valuable time doing analysis, not accounting.
- Benefit from a full suite of standard reports, as well as customizable inquiry using our integrated tools.

ENJOY SEAMLESSLY-INTEGRATED, ADAPTIVE SOFTWARE

As part of the Multiview Financial Software suite, General Ledger gives you a single point of entry that guarantees consistent information, and eliminates reconciliation problems. The Multiview suite provides you with an adaptable, integrated and comprehensive data warehouse. Our product is ready to be data mined by your end users, yet requires no IT involvement.

The genius of Multiview is in the simplicity; the power is in the adaptability. Our exceptional design can support your organization's growth, without the usual growing pains. Multiview's products reflect the best practices of over two decades of evolution, and the feedback of thousands of Multiview users.

TOP-NOTCH SERVICE AND SUPPORT

As a Multiview customer, your call goes directly to your dedicated Customer Support representative, who understands your business and needs. This personal service, combined with the fact that our Customer Support accountants have 50+ years of accounting and Multiview experience, results in 98% "first call" resolution.

IMPLEMENTATION GUARANTEE

Our 60-day guarantee means you can be up and running in a heartbeat!
